

Digital Inclusion / Digital Health for NHS Services

Aims for the next 9 months

Build confidence and capacity across the VCSE sector

Support organisations with delivering digital health support in their own communities.

Increase the reach and use of digital health tools

Support more people across Derbyshire to access and use tools like the NHS App, helping them manage their health more easily and independently.

Strengthen collaboration between VCSE groups and health partners

Support stronger, more joined-up working between projects and GP practices - reducing duplication, sharing learning, and creating more consistent support for Derbyshire residents.

Support available

Digital health toolkit
(August 2025)

Quarterly training sessions
available through the DSD
network

Bespoke support and 1-to-1
help
